

DF-920

Fully Automatic Tabletop Folder

Let Duplo's DF-920 fully automatic tabletop folder take care of all your folding needs. High-speed folding up to 280 sheets per minute has never been easier! With six popular pre-programmed folds and a multitude of custom folds, crisp and accurate folding for a variety of applications is accessed at the touch of a button.

Unique sound absorbers inside the machine dramatically reduce the amount of sound not only when folding but also when fold stoppers are moving. This makes the high-speed DF-920 ideal for all businesses and organizations.

The patented feed system ensures reliable feeding and accurate folds for a wide range of paper sizes,

weights, and stocks. No manual adjustments are needed, as the DF-920 automatically recognizes five popular paper sizes – letter, legal, ledger, 1/2-letter, and 1/2-legal. When powering back on, the fast set-up mode allows the DF-920 to automatically recall the last job.

Simply load the automatic elevating feed tray with up to 500 sheets, select the fold type, and hit start. A four-digit counter may be set to ascend or descend. Additionally, the batch mode allows the operator to input the exact number of sheets to be folded in each batch.

The Duplo DF-920 is the fastest, most easy to use tabletop folder for all applications demanding speed and precision folding.

- High-speed folding up to 280 sheets per minute
- Sound absorbers ensure quiet operation
- Six popular pre-programmed folds
- Special "cross folding" for right-angle folds
- Two programmable memory settings for custom folds
